Summary

Software Engineering graduate with hands-on Java Spring Boot internship experience and full-stack project work in JavaScript/TypeScript, React, Next.js, and Node.js. Built and deployed web applications with automated tests and CI/CD.

Experience

Java Web Developer Intern
FPT Software

Ho Chi Minh City, Vietnam
June 2021 – Sept 2021

- Worked in a four-person team on an online quiz and learning platform built with Java Spring Boot and PostgreSQL
- Developed the quiz creation frontend with HTML, CSS, Bootstrap, and jQuery, integrating it with backend APIs
- Used SVN in the team development workflow and strengthened practical Java and SQL skills through mentor-guided work

Projects

GoCode - Online Coding Judge and Practice Platform

2024

- Built a full-stack platform with 56 algorithm problems, Monaco editor, submission history, streak/heatmap tracking, and admin dashboard
- Implemented Stripe Premium payments with idempotent webhooks, RS256 JWT authentication, and rate limiting
- Deployed on Vercel with 760+ automated tests (86.5% line coverage) and k6 performance testing

Vn-Social Network - Graduation Thesis

2022

- Built a full-stack social network with real-time private/group chat, WebRTC video/audio calling, and multi-type file sharing (up to 500MB via GridFS)
- Implemented a separate Socket.IO server for real-time communication, role-based access control, and NSFW content filtering
- Containerized with Docker, ran with PM2, and deployed on Azure

ShoeStore - E-Commerce Website

2021

- Built a full-stack e-commerce web application for selling shoes with product catalog, session-based shopping cart, checkout, and guest order tracking
- Implemented user authentication with Spring Security, BCrypt password encoding, and email verification
- Developed a bilingual (Vietnamese/English) UI using Spring i18n and Thymeleaf

Library Management System

2021

- Built a desktop application for university library management with book cataloging, author management, student/reader management, book issuing/returning, and Excel export
- Implemented a three-layer architecture with Repository Pattern and Unit of Work using Entity Framework 6

Vietnamese Handwritten Character Recognition

2022

- Built a deep learning OCR application using CRNN architecture (VGG16 + Bidirectional LSTM) with CTC loss
- Implemented image preprocessing pipeline using OpenCV and deployed a Streamlit web interface

Education

Ho Chi Minh City University of Technology and Education

Sept 2017 – June 2025

B.Sc. in Information Technology (Software Engineering)

- GPA: 7.65/10

Skills

Languages and Frameworks: JavaScript, TypeScript, React, Next.js, Node.js, NestJS, Java (Spring Boot), C# (.NET), Python

Databases: PostgreSQL, MongoDB, MySQL, SQL Server, Prisma

Tools and Platforms: Git/GitHub, SVN, Docker, Postman, Vercel, AWS, Azure

Testing and Security: Vitest, k6, JWT (RS256), bcrypt, rate limiting
